At a glance

Added (3)	Butterfield Stage at Railyard Park, Record, Fayetteville Town Center.
Corrected (3)	Rogers Historical Museum (physical address 313), Arvest Ballpark (3000 Gene George Blvd), Lawrence Plaza (214 NE A St).
Re-sourced (2)	Walton Arts Center and Walmart AMP, moved off WAC-run sites to tourism listings.
Smaller fixes (3)	Railyard Bike Park alias removed, Jones Center website set, Walmart Museum website confirmed.
Hand checks (10)	Recorded on every venue with a remaining warning.
Not done (1)	Luther George Park. See 'Blocked or needs your call'.

Correction to the last report

The last report said Arvest Ballpark's mismatch was a geocoder quirk and "checked by hand". That was wrong: I had checked the location, not the address. The address was stale. The checker no longer has a rule that can downgrade a far mismatch like that, and a test now pins this case as an error.

Venues added

Fayetteville Town Center *(Fix 6)*

Restored: the city's ORA page gives the address, and OSM has the building.

Field	Value	Source
Name	**Fayetteville Town Center** fayetteville-town-center	fayetteville-ar.gov
Type	other	
Aliases	Town Center	
Address	15 W Mountain St, Fayetteville, AR	fayetteville-ar.gov
Location	36.061862, -94.159965	openstreetmap.org (Unnamed building tagged 15 W Mountain St; the Town Center Parking Deck is the separate structure to its south)
Website	*none*	
Notes	Event venue on the downtown square, leased by the Advertising and Promotion Commission.	

Butterfield Stage at Railyard Park *(Fix 3)*

The Railyard Live concert site, kept separate from the Railyard Bike Park (299 E Cherry St).

Field	Value	Source
Name	**Butterfield Stage at Railyard Park** butterfield-stage	rogersar.gov (City calendar: Butterfield Stage at the Railyard Park in Downtown Rogers)
Type	music venue	
Aliases	Butterfield Stage, Railyard Park, Railyard Live	
Address	101 E Cherry St, Rogers, AR 72756	rogersar.gov
Location	36.330479, -94.115836	openstreetmap.org
Website	railyardlive.com	destinationrogers.com (Lists railyardlive.com for Butterfield Stage)
Notes	Home of the Railyard Live concert series. Not the Railyard Bike Park (railyard-bike-park), 299 E Cherry St.	

Record *(Fix 4)*

Event space downtown. Its own site shows no street address, so the address comes from Downtown Bentonville's listing.

Field	Value	Source
Name	**Record** record	recorddowntown.com
Type	other	
Aliases	The Record, Record Downtown	
Address	104 SW A St, Bentonville, AR 72712	downtownbentonville.org
Location	36.371836, -94.210543	openstreetmap.org (Tagged The Record)
Website	recorddowntown.com	downtownbentonville.org (Lists recorddowntown.com)
Notes	Event space in the former Benton County Daily Record building. Its own site shows no street address.	

Venues changed

Old values in red, new values in green. Check dates that only moved to today's date are left out.

Rogers Historical Museum *(Fix 1)*

The museum's site lists 313 S 2nd St as the physical address (Hailey Building: exhibit galleries and museum store) and 322 as the mailing address and Key Wing. Physical address wins.

Field	Before	After
Address	322 S 2nd St	313 S 2nd St
Notes	Museum spans several downtown buildings; 322 S 2nd St is its listed address.	322 S 2nd St is the mailing address and the Key Wing (Education Center & Historic Hawkins House).
Address source note	*none*	Physical address: Hailey Building, exhibit galleries and museum store
Location source note	OSM tags the building 313 S 2nd St	*none*

Arvest Ballpark *(Fix 2)*

The old address was wrong; the 5,866 m geocoder mismatch was real. Re-sourced from the Naturals' MiLB ballpark guide, and it now geocodes within range.

Field	Before	After
Address	3000 S 56th St	3000 Gene George Blvd
Website	*none*	milb.com/northwest-arkansas/ballpark/ballpark-guide
Notes	*none*	Northwest Arkansas Naturals' ballpark guide. springdalear.gov pages render client-side, so the address couldn't be read there.
Name source	en.wikipedia.org/wiki/Arvest_Ballpark	milb.com/northwest-arkansas/ballpark/ballpark-guide
Address source	en.wikipedia.org/wiki/Arvest_Ballpark	milb.com/northwest-arkansas/ballpark/ballpark-guide
Website source	*none*	milb.com/northwest-arkansas/ballpark/ballpark-guide
Address source note	*none*	At the corner of Gene George Blvd and Watkins

The Railyard Bike Park *(Fix 3)*

Removed the alias "The Railyard" so the bike park can't be confused with the concert site.

Field	Before	After
Aliases	Railyard Bike Park, The Railyard	Railyard Bike Park
Notes	*none*	Not the concert site: Railyard Live concerts are at Butterfield Stage (butterfield-stage).

The Jones Center *(Fix 5)*

thejonescenter.net now redirects (301) to thejonescenter.org, which shows the address.

Field	Before	After
ZIP	*none*	72764
Website	*none*	thejonescenter.org
Notes	thejonescenter.net did not resolve on 2026-10-03, so no website is set.	thejonescenter.net now redirects to thejonescenter.org.
Address source	encyclopediaofarkansas.net/entries/jones-center-13985	thejonescenter.org
Website source	*none*	thejonescenter.org
Website source note	*none*	thejonescenter.net redirects here (301)

Walmart Museum *(Fix 7)*

No separate website: walmartmuseum.com redirects (301) to the Walmart corporate page, so that stays.

Field	Before	After
Website source note	*none*	walmartmuseum.com redirects here (301); no separate site

Lawrence Plaza *(Fix 8)*

The city's facility page gives the street number.

Field	Before	After
Address	NE Blake St	214 NE A St
Website	*none*	bentonville.ar.gov/facilities/facility/details/Lawrence-P...
Notes	Source gives only the street, no number.	*none*
Name source	downtownbentonville.org/go/lawrence-plaza	bentonville.ar.gov/facilities/facility/details/Lawrence-P...
Address source	downtownbentonville.org/go/lawrence-plaza	bentonville.ar.gov/facilities/facility/details/Lawrence-P...
Website source	*none*	bentonville.ar.gov/facilities/facility/details/Lawrence-P...

Walton Arts Center *(Question A)*

Re-sourced off WAC's own site, to the arkansas.com listing. The listing gives ZIP 72702, which is Fayetteville's PO box ZIP, so no ZIP is set.

Field	Before	After
ZIP	72701	*none*
Name source	waltonartscenter.org	arkansas.com/experiences/discover/attraction-listings/wal...
Address source	waltonartscenter.org	arkansas.com/experiences/discover/attraction-listings/wal...
Website source	waltonartscenter.org	arkansas.com/experiences/discover/attraction-listings/wal...
Address source note	*none*	Listing gives ZIP 72702, Fayetteville's PO box ZIP, so no ZIP is set

Walmart AMP *(Question A)*

Re-sourced off WAC-run sites (WAC operates the AMP), to the destinationrogers.com listing. The website is the one that listing gives.

Field	Before	After
Website	walmartamp.com	waltonartscenter.org/amp
Name source	waltonartscenter.org	destinationrogers.com/listings/walmart-amp/218
Address source	waltonartscenter.org	destinationrogers.com/listings/walmart-amp/218
Website source	walmartamp.com	destinationrogers.com/listings/walmart-amp/218

Hand checks added

Each remaining warning now has a recorded hand check. It states only what was checked, with the source. Hand checks explain warnings; they never clear errors.

Venue	Warning	Hand check
Bud Walton Arena	geocoder found no match for the address	OSM way 469590531 is Bud Walton Arena (leisure=stadium), tagged 1270 W Nolan Richardson Dr, the same address Wikipedia gives. The street was renamed in 2021, which may be why the geocoder finds no match. source
Kessler Mountain Regional Park	location is 1250 m from the geocoded address (2600 W JUDGE CUMMINGS RD, FAYETTEVILLE, AR, 72701)	OSM way 501095054 is the Kessler Mountain Regional Park boundary (leisure=park). The seed point is that outline's center, so its distance from the street address is expected. source
Lake Fayetteville Park	location is 1529 m from the geocoded address (1330 E LAKE FAYETTEVILLE RD, FAYETTEVILLE, AR, 72764)	OSM way 500301119 is the Lake Fayetteville Park boundary (leisure=park). The seed point is that outline's center, so its distance from the street address is expected. source
Clinton House Museum	geocoder found no match for the address	OSM way 468584518 is the Clinton House Museum (tourism=museum), tagged 930 West Clinton Drive, the same address as the museum's site. source
Walmart AMP	location is 333 m from the geocoded address (5079 W NORTHGATE RD, ROGERS, AR, 72758)	OSM way 958729520 is the Arkansas Music Pavilion (amenity=theatre), tagged 5079 W Northgate Rd. The seed point is that outline's center; the geocoder estimates a point along the road. source
Pinnacle Hills Promenade	location is 272 m from the geocoded address (2203 S PROMENADE BLVD, ROGERS, AR, 72758)	OSM way 223586701 is Pinnacle Hills Promenade (shop=mall), tagged 2203 Promenade Boulevard. The seed point is the mall outline's center; the geocoder estimates a point along the road. source
Scott Family Amazeum	location is 512 m from the geocoded address (1009 MUSEUM WAY, BENTONVILLE, AR, 72712)	OSM way 533182186 is the Scott Family Amazeum building (tourism=museum). The museum's site gives 1009 Museum Way; the geocoder estimates a point along that road. source
Orchards Park	geocoder found no match for the address	OSM way 254750619 is the Orchards Park boundary (leisure=park). The seed point is that outline's center. source
Slaughter Pen Trail	location is 1265 m from the geocoded address (2400 N WALTON BLVD, BENTONVILLE, AR, 72712)	OSM relation 20042336 is the Slaughter Pen MTB Park area. The seed point is the area's center; 2400 N Walton Blvd is the city's listed address for the trail system. source
Pea Ridge National Military Park	geocoder found no match for the address	OSM way 541689611 is the park's visitor center (tourism information=visitor_centre). OSM tags it 15930 Military Park Road while NPS lists 15930 National Park Dr; same building, and NPS is used. source

Blocked or needs your call

Luther George Park (fix 6)	Not restored. The city page loads its content in the browser, and the page itself contains only a calendar feed with no address. The address, 300 Park St, appears only on downtownspringdale.org (the Downtown Springdale Alliance, not the city). OSM has the park. Your call: accept the Alliance page as the source?
Arvest Ballpark on springdalear.gov (fix 2)	Couldn't verify there, for the same reason, so it cites MiLB only. MiLB blocked the fetch tool, so one fetch was made with our bot user agent.
sources table (question B)	The table doesn't exist until build step 7, which already seeds Crystal Bridges, the Momentary, and WAC with enabled = false and "awaiting permission". Your call: bring it forward, or leave it for step 7?

Answers to your questions

A. What was fetched from Walton Arts Center

This broke your decision: I treated venue research as separate from the fetching pipeline, and it isn't. On 2026-10-03 I made 4 requests to WAC-run domains, all through Claude's fetch tool, not our bot:

#	URL	Result
1	`https://www.waltonartscenter.org/`	Homepage, read once
2	`https://www.amptickets.com/`	Redirected (307) to walmartamp.com
3	`https://walmartamp.com/`	Homepage, read once
4	`https://walmartamp.com/contact`	404

robots.txt and terms were not fetched again. Step 0's findings (docs/sources-terms.md): WAC publishes no terms of use, only a privacy policy and ticketing policies, and has no robots.txt (that URL returns an HTML page). Both venues are now sourced from tourism listings; walmartamp.com was not used because WAC runs the AMP. The AMP's website field still points to waltonartscenter.org/amp/, as the listing gives it: a link we display, not a fetch.

B. Crystal Bridges and the Momentary

The permission email already exists, drafted in step 0 at docs/outreach/crystal-bridges-momentary-permission-email.md, so no second one was written. For the sources table, see 'Blocked or needs your call'.

Process changes now in place

Physical over mailing address	Recorded in the seed file's $comment and in Claude's memory for future sessions.
Geocoder mismatch over 1 km	An error that blocks sign-off for anything except parks (trails are typed as parks) and campuses. The street-direction rule that hid the Arvest problem was removed; a test pins the Arvest case as an error. Code: src/lib/venues/verify.ts.
Hand checks recorded	New handChecks field on each venue (what was checked, source, date). Printed under the warning in both reports. Part of the signed-off hash.
No research fetches from unpermitted sources	No pages from WAC/AMP, Crystal Bridges, or Momentary domains, even for research. In the $comment and in memory.

Tests after the changes: lint and typecheck clean, 106 unit tests and 19 database tests passing.
